\*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

†Figures not available.

Explanation of symbols used:— B.—Births; B. R.—Birth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.D.—Respiratory Diseases; M.D.—Maternal Deaths; D. R.—Death Rate; I. D.—Infantile deaths (included in total deaths); ..—Nil information.

## REMARKS

The figures of births and deaths shown in this statement for week ending the 22nd September, 1956, relate to 184 towns with an estimated population of 25,471 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 58% of the total number of towns representing 61% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 18,042 and 6,659 representing birth and death rates of 36.8 and 13.6 per thousand of population respectively.

(a) States (Part A and C).—The data here relate to 151 towns with an estimated population of 21,374 thousands. Information about Andhra, Assam, Delhi, Madhya Pradesh & West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 60% of the total number of towns representing 64% of the total population is covered. The number of births and deaths recorded in these towns were 15,709

and 5,862 representing birth rates and death rates of 38.2 and 14.3 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population

(b) States (Part B).—The data here relate to 33 towns with an estimated population of 4,097 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 51% of the total number of towns representing 51% of the total population is covered. The number of births and deaths recorded in these towns were 2,333 and 797 representing birth and death rates of 29.6 and 10.1 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
